Associated Partner - Letter of Support
for the Horizon 2020 Framework Programme, H2020-SFS-08-2017
Proposal: 774340 – Organic-PLUS

Dear Research Executive Agency,

we are pleased to be able to offer our support to the Horizon 2020 proposal **Organic-PLUS** which will be submitted by a wide consortium of partners coordinated by Dr Ulrich Schmutz (ulrich.schmutz@coventry.ac.uk) from the Centre for Agroecology, Water and Resilience at Coventry University. 'Organic-PLUS' means minimising, and eventually phasing out contentious inputs from certified organic agriculture.

*The overall aim of the **Organic-PLUS** project is to provide high-quality, trans-disciplinary, scientifically informed decision support to help all actors in the organic sector, including national and regional policy makers, to reach the next level of the organic success story in Europe.*

The stakeholder organisation I/we represent is willing to support the Organic-PLUS project as an associated partner with the following of roles and benefits:

- contributing to the project's stakeholder database in Europe and international
- first hand access to **Organic-PLUS** newsletters, factsheets and meetings
- taking part in regional workshops
- taking part in Europe wide stakeholder conferences
- contributing to regional, national and European policy process to phase-out contentious inputs and promote the transition to a Bio-Economy.

We are confident that **Organic-PLUS** has the potential to contribute to the transition to a Bio-economy in Europe and therefore, we fully support the project and are looking forward to a fruitful collaboration as an associated partner.

Yours sincerely
